

JUNE 2022 NEWSLETTER

Welcome to the June issue of the Advance Anti-Slip Surfaces newsletter

**Let's prevent
slips trips and
falls on stairs!**

Pedestrian access surfaces present a continuous risk of personal injury from a slip, a stumble, a trip, a tumble, a falter or a fall, especially if they're not protected with an anti-slip surface.

Advance Anti-Slip Surfaces' Class 1, ready-to-install, retrofit, metal backed anti-slip products keep staff, contractors, workers and visitors, safe.

There are many factors weighing on how an incident such as a slip, trip, or fall can happen, such as when water, oil or debris is spilt or left unattended on stairs, steps or landings.

By simply retrofitting our durable non-slip stair nosings you will be saving many incidents and injuries from happening.

There are many options to choose from to make stairs safe. Choose a size that provides the best coverage, choose a level of grit that suits the application, choose a colour that provides a contrast to the substrate for increased visibility. Advance Anti-Slip has many options available. Our free Checklist is available on the website to assist you.
