

MARCH 2022 NEWSLETTER

Our Higher Visibility products have become very popular, with Nano-Green Stair Nosings becoming much sought after.

Higher Visibility Red Stair Nosings

Higher Visibility Nano Green Stair Nosings

Welcome to the March issue of the Advance Anti-Slip newsletter. There's no doubt that the past couple of years have been difficult for everyone. The pandemic has challenged and affected us all. Restrictions, border closures, supply chain and shipping delay issues as well as business shutdowns are just some of the tests of business resilience encountered. Through all of these challenges, we've been able to continue to provide our quality anti-slip products to our customers. As border closures and various restrictions continue to ease, we will continue to do our best to support our customers and are available to help in any way possible.

Ladder safety appears to be a priority for our WHS compliance authorities currently. We have been inundated with enquiries about our anti-slip ladder rung covers as an effective way to prevent a slip or fall from a fixed ladder. If you need samples or information regarding anti-slip ladder rung covers please let us know.

PRODUCT SPOTLIGHT
