

MAY 2022 NEWSLETTER

**Welcome to the May issue
of the Advance Anti-Slip
Surfaces newsletter**

**"These types of
incidents can
be avoided"**

Pedestrian access surfaces present a continuous risk of personal injury, or even a possible fatality, from a slip, stumble, trip, tumble, falter or fall.

There are many factors weighing in on how an incident such as a slip, trip, or fall from the same level can happen, such as water, oil or debris spilt or left unattended on a walkway, ramp, landing or platform.

Advance Anti-Slip Surfaces, Class 1, ready-to-install, metal backed antislip products keep your staff, workers and visitors safe and minimise the risk of such an event occurring.

Take care and stay safe over the coming month.

**Ramps, landings, platforms and walkway
safety is paramount for every pedestrian
access. Advance Anti-Slip has nonslip
surfaces to suit every situation.**

PRODUCT SPOTLIGHT

Advance Anti-Slip Surfaces Safeplates products are robust, dependable, and a hard-wearing surface that provides firm footing for all pedestrian access areas.
