Reasons why Anti-slip ladder rung covers are essential!

***Welcome to the April
issue of the Advance Anti-Slip
Surfaces newsletter.***

Slips, trips, stumbles, tumbles, and falls are the highest frequency safety risks prevailing in most industries and workplaces today.

The severity of each possible hazard can depend on the industry, the situation, and the person, but one small slip, stumble, trip, tumble or fall has the potential to cause serious incident or injury, or in the worst case, even a fatality. This can lead to the possibility of legal liability, lost production time, and lengthy workplace absences.

Businesses also have a duty of care for the well-being of their employees, contractors, visitors, or customers, which could mean serious consequences if one of them was injured while climbing or descending a ladder in the workplace.

So, why do we need antislip Ladder Rung Covers?

Here are some of the many reasons why non-slip ladder rung covers are essential:

1. Provides a greater surface area on the ladder rung for people to step on,
2. Provides a visual reference point for people, including people with a vision impairment, and defines the rungs to prevent a possible fall,
3. Supports and protects the ladder rung from unnecessary wear and tear or any possible impact damage, which extends the useful life of the ladder,
4. An antislip surface provides a firm footing, keeping people safe from a slip, stumble or fall,
5. Would mitigate any possible liability from an accident occurring,
6. Provides a safer access for workers, contractors, and visitors,
7. Reduces accidents, medical and insurance costs, lost productivity, and increases moral,
8. Delivers firm footed traction from the top to the bottom of the ladder.

Due to a variety of reasons, ladders can often become hazardous. Antislip ladder rung covers are an effective way to provide extra grip to the rungs where people tread the most.

A half round ladder rung cover just does not provide enough of a nonslip surface area on the ladder rung. The heel of a person's boot can often fit lower on the rung cover which could almost turn a half round rung cover into a secondary trip hazard.

Advance Anti-Slip nonslip ladder rung covers provide a confident 270 degree of slip protection, exactly where it is needed the most. Their performance is verified in the world's toughest environments, on offshore drilling platforms, marine vessels, in greasy food processing facilities, dusty manufacturing plants, automotive refinishing operations, and power generation facilities.

ADVANCE ANTI-SLIP SURFACES Pty. Ltd.

HIGHER VISIBILITY LADDER RUNG COVERS

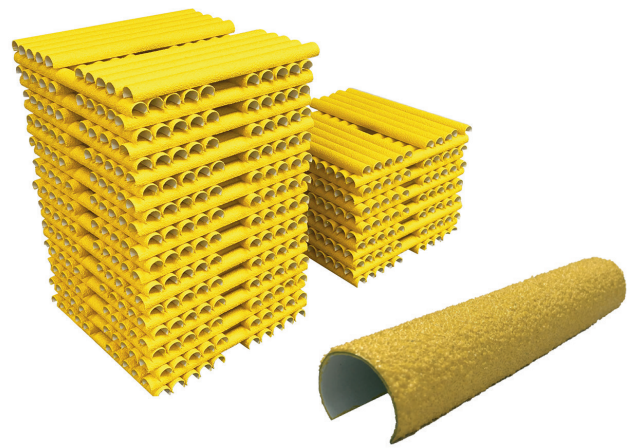

How to Measure Ladder Rung Covers

- Metal backed with a carborundum grit and hardened resin surface
- Higher Visibility Safety Yellow, Nano Green, Red
- Strong, Resilient, Dependable
- Provides Secure Footing on all ladder rungs
- Australian Standards compliant
- Non-wearing, Strong, Durable, Reliable
- Easy to install

LADDER RUNG COVERS

So, when it comes to pedestrian health and safety there should be no shortcuts... Which is why it is essential that an anti-slip hazard control measure is considered and implemented throughout all locations and in every facility, as very often ladders are a foremost accident concern.

Installing Advance Anti-Slip non-slip ladder rung cover products will maximise pedestrian safety and prevent many of the incidents and injuries that reduce productivity and increases costs and statistics. They are resistant to many chemicals, corrosion, fire, and the harsh abuse of boot traffic up and down the ladder.

Advance Anti-Slip Surfaces is the primary Australian owned manufacturer and supplier of an extensive range of Class One metal backed antislip ladder rung cover safety products.

These durable non-slip rung covers resist corrosion and impacts, providing years of anti-slip protection in a variety of environments, from offshore drilling platforms to

commercial applications. Ladder rung covers are available in circular or square profiles to easily fit over existing ladder rungs.

Our nonslip products comply with national and international compliance requirements for quality, performance, and safety.

We consistently prove our commitment to all industry sectors by only producing the most cost-effective highest quality antislip products available, which are backed by an extensive warranty.

Pictures of some of the many antislip elements we have supplied can be found on our website Gallery page. Go to: [Advance Anti-Slip Product Gallery](#) | [Advance Anti-slip Surfaces \(advanceantislip.com.au\)](#)

If you have a slip problem that needs a solution, let the team at Advance Anti-Slip help solve it for you.
