

Antislip Solutions for the Shipping and Dockyard Industry

35 years

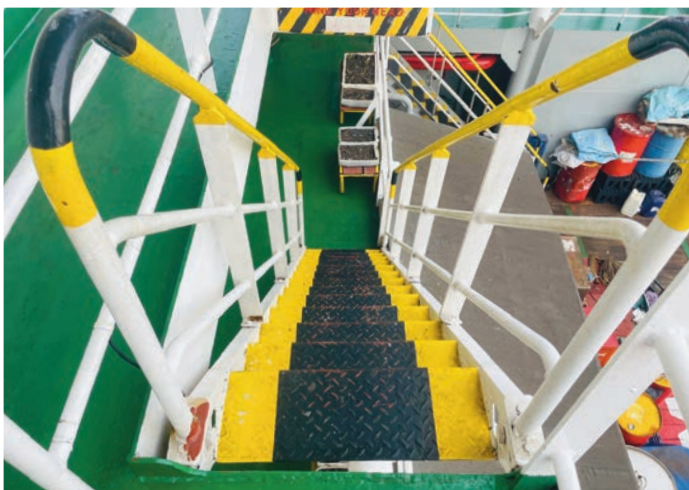

Enhancing Safety and Efficiency in High-Traffic Maritime Environments

Slippery surfaces in shipping yards and dockyards are among the most common causes of workplace accidents. Our Class 1 metal-backed antislip products are engineered to tackle these challenges head-on, providing unparalleled durability, traction, and performance in even the most demanding maritime environments.

Why Our Antislip Products Are Perfect for the Shipping Industry

- **Unrivalled Durability in Marine Conditions**
Constructed to resist saltwater corrosion, oil, and wear, our antislip solutions are built for long-term use in harsh maritime environments.
- **Tailored Designs for Dockyards**
Customisable to fit ramps, gangways, ladders, ship decks, and any other surface where dock safety is crucial.
- **Compliance with Australian and International Standards**
Certified to meet Australian, OSHA, and maritime safety standards, ensuring peace of mind and adherence to regulations.
- **Cost-Effective Safety**
Reduce workplace incidents and operational delays with dockyard safety solutions that last for many years without frequent replacements.

Key Applications

Our antislip products are specifically designed for critical areas in dockyards and ships:

- **Loading Ramps:**
Prevent accidents during heavy cargo movement.
- **Gangways:**
Ensure safe access for crew and dock workers.
- **Ship Decks:**
Deliver maximum grip on slippery and uneven surfaces.
- **Dock Steps and Ladders:**
Enhance safety during vertical movement.
- **Storage Areas:**
Minimise risks in areas prone to spills and moisture.

Real Stories from the Field

Our solutions are trusted by leading shipping companies, improving safety metrics and operational efficiency.

"We installed the antislip treads on our gangways and saw a 50% reduction in slip incidents within six months."

Dave, Safety Manager, International Freight & Cargo Company.

"These products have been a game-changer for our dockyard operations. They're durable, effective, and easy to maintain."

Peter, Operations Director, Port Authority.
