Safety Compliance Begins with Advance

Supporting safer steps across every surface

At Advance Anti-Slip Surfaces, we understand that safety compliance isn't just a box to tick — it's a vital responsibility. Whether it's stairs, fixed ladders, walkways, or general pedestrian access areas, compliance starts with effective, reliable, and long-lasting antislip protection.

That's why our **complete Class 1 metal-backed antislip range** is the ideal solution for high-risk environments. From stair nosings and ladder rung covers to Safeplates and antislip tapes, Advance Anti-Slip delivers a comprehensive system that supports:

- ✓ Safer movement across all pedestrian access areas
- ✓ Easy compliance with national regulations
- ✓ Superior durability in the harshest environments

STANDARDS MATTER — AND WE MEET THEM.

Our products meet or exceed the requirements of:

- **AS/NZS 4586** (Slip resistance)
- **AS/NZS 1657** (Fixed platforms, walkways, stairs and ladders)
- **AS/NZS 1428** (Design for access and mobility)
- The **National Construction Code (NCC)**

Unlike many alternative offerings, **Advance products are built for longevity**, engineered with a robust metal backing and a hard-wearing antislip surface designed to outperform others in both lifespan and reliability. We're proud to back this with an **extensive warranty**, offering peace of mind for years to come.
